Congratulations to School for the new session with new technology As all the students are attending their virtual classes using the Management Team App it is like real learning where students are connecting with teachers and experiencing this new system of learning Till yesterday Anjali was confused on How is it possible to study online and how will her teachers teach her But today all the confusion vanished after attending the class. She attended and enjoyed all the classes with the same excitement as she enjoyed at her classroom at school and she interacted with teachers when she asked to answer From Parents side We alongwith Anjali enjoyed the virtual class. Its an introduction of a new mode of learning apart from using gadgets for other use. Hats off to the school for organising this platform for their students at a very short notice Teachers are not only teaching to students they are teaching to parents too Thanks to
